## Our sustainability projects

We inject HVO100 (a sustainable biofuel entirely made from certified feedstock) renewable fuels **into our trucks** wherever possible.

We **invest in the broader fuel supply chain** by buying the equivalent in HVO100 sustainable fuels needed for your routes.

Whatever emissions are left, we neutralise through investments in **high standard climate reduction projects.**

We transport your letters and parcels with safe, circular and **reusable containers**.

We work together with our **parent company PostN**L who are internationally recognised for their sustainability efforts in the Benelux. Read more:

PostNL sustainability

Sustainability certification

We are submitting for **EcoVadis certification for Spring GDS in 2023**

End-2-end emission reporting

for e-commerce customers in 2024
